**Postdoc position to work on peptide perception/signaling**

I am seeking a postdoc to join our group at the University of Zurich as part of a SNSF-funded project to investigate the perception and signaling mechanisms of a conserved family of plant cysteine-rich peptides.

Essential requirements:

- Hands-on experience in plant molecular genetics and/or protein biochemistry. Previous experience in protein biochemistry will be an advantage.
- A strong interest in signaling processes.
- Evidence of independent experimental design, quantitative data analysis, and scientific communication, for example through publications or preprints.
- Good written and spoken English, careful experimental practice, and a collaborative mindset.

How to apply:

Please send a motivation letter outlining your interests and relevant experience, a CV with publications, and contact details of two referees as a single PDF to cyril.zipfel@botinst.uzh.ch with 'Postdoc_Nov 2026_Name Surname' as email subject. Informal enquiries or questions are welcome. Deadline for application is Dec 15th.
